

1. Don't use the PRINT button on the web browser instead use the  at the bottom of the screen.
2. This will change the view so that one sees what is below...

**Town of York
Map Printer**

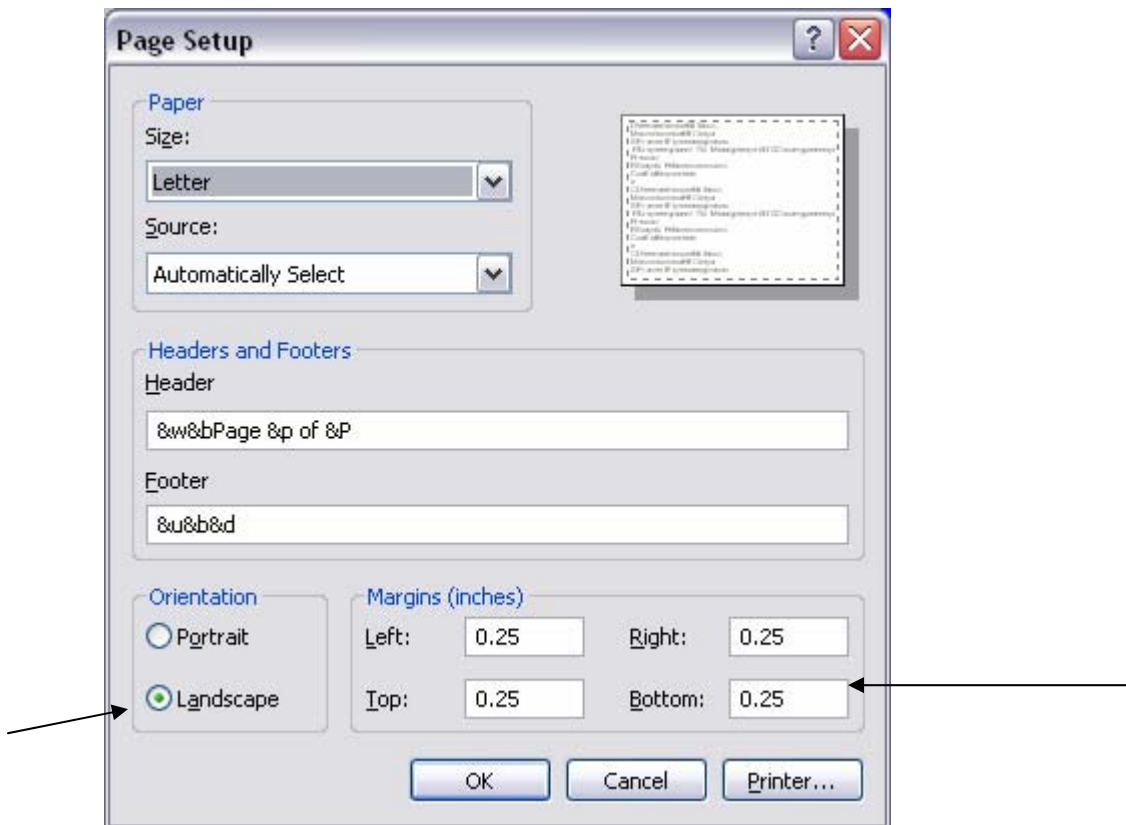

Please Enter Titles For Your Map:

GIS Map Print

Map Name

Make Map

3. Once the Make Map button has been pushed a new browser window opens. At this point the user will want to click on the FILE menu and go to PAGE SETUP. A new window opens that looks like the one below.

This is where the user wants to change the PAGE SETUP to a Landscape Orientation and change the Margins to 0.25 inches as shown above by the arrows. Once this is done the print job should look properly.
