Good morning David,

The results of the testing are attached and yes no news is good news in that we do not need to pursue further testing. There was inquiry on the techniques used for sampling and I will forward that email shortly to you. At this time the Code Department and the Local Health Officer have no issues with the testing and will defer to the local Fire Department's earlier responses.

Thank you,
Amber

Hello Amber,

We have received correspondence from the planning department in regards to the sampling at the distillery, which seems to have removed concerns on the topic. I was just checking in with you on what, if any other concerns you have with our proposed project. There was mention at our last planning board meeting that you had contacted the state fire marshal for an additional opinion to what we had already received from the York Village Fire Department. We haven't heard anything back about that.

We are working on wrapping up this application process and trying to address things that have been brought up so we can be prepared for future meetings. We are trying to avoid things being brought up or added at the last minute so that material can be properly reviewed and responded to if needed.

I am hopeful that no news is good news and that you don't have any other concerns. Please let us know if that isn't the case so we can work towards addressing any and all concerns to be ready for our next meetings.

Thanks you for all you do,
David Woods II
