

Cable Network in 2005

York Comprehensive Plan Inventory and Analysis Utilities Chapter March 22, 2005

This map was created using information provided by Melinda Poore, Director of Government and Public Affairs with Time Warner Cable, in Maine, as well as the Town of York Planning Department. The location of cable fiber was provided by Time Warner Cable, but the location of cable fiber running up and down I-95 should be looked upon as questionable. The information displayed can be used to demonstrate the availability of cable television and cable internet service through out the Town of York.
